ROLE OF UKRAINE IN THE EUROPEAN EDUCATIONAL SPACE

Ukraine as an important geopolitical reality on the European mainland is an integral part of the new system of European and global ties and relations formed at the turn of the renaissance. Significant factors in the growth of Ukraine's international significance are its extremely favorable position in the heart of Europe, at the junction of Orthodox, Western and Islamic societies. Due to this, Ukraine is a full party in the broad commerce of societies and civilizations in the modern world.

The demand of time is the training of specialists of new quality who are to have creative thinking, quickly navigate in moment's rich information space, make non standard opinions, learn and develop throughout life, and most importantly – to be loyalists of their motherland.

The purpose of modernization of advanced education in Ukraine is to produce a model of the educational process that would optimally combine the stylish domestic and foreign traditions. The combination of humanistic traditions of Ukrainian pedagogy and foreign experience of educating a personable of active independent action will create a dynamic, mobile, competitive model of the educational system. The problem of the quality of education in Ukraine has never before been so important ideologically, socially, economically and technically as it is nowadays.

The peculiarity of the current moment in Ukrainian education lies in the particularly critical need for its farther development in a delicate situation in the profitable and spiritual spheres.

The renewed nature of education, declared in the National Doctrine of its development, according to which the state can give the humanistic nature of

education grounded on artistic and historical values of the Ukrainian people, its traditions and church, uses the experience of leading universities in Europe and the world.

Along with the work on establishing effective relations with associates from European Union member countries and developing and enforcing new forms and styles of pupil literacy, common programs of common study of students abroad are successfully enforced through exchange and externship programs for students, graduate students and pedagogues.

Harmonious perpetration of innovative tutoring styles is important to constantly maintain the high quality of all factors of the educational process, combining scientific and educational work, establishing connections between public universities and employers and, eventually, expanding transnational connections. Technologies of slide lectures, computer testing, distance literacy, electronic handbooks and tutoring accoutrements, transnational educational programs have become widely used in this direction.

Among the main technologies on which the creation of invention and educational coffers is based, a significant place belongs to multimedia technologies, which are extensively used in distance literacy.

Moment's society, which is conforming to the challenges of globalization, needs clear answers to multitudinous questions and relies fully on innovative scientific developments. They, in turn, depend on the active preface of scientific and specialized achievements and the rearmost literacy technologies in the educational process of advanced education.

In such conditions, communication with our neighbors, who have formerly taken a step towards European integration, can and should become an important tool for forming a positive station towards European integration.

It's especially important for Ukraine to create a favorable investment climate so that the earned capital and new chops and capacities of settlers stimulate Ukrainian citizens to return to Ukraine and start their own business, create new jobs, therefore stimulating long-term profitable growth.

Ukrainian experts suggest that the state turns the «brain drain into brain gain» [2, p. 57], which will allow the most effective use of the country's scientific eventuality and support its education system. A seductive point of the help import model is the creation of a scientific diaspora a kind of association of Ukrainians working abroad who could help Ukrainian scholars and graduate scholars going to study abroad, as well as provide advice to Ukrainian scientific and government institutions [3, p. 18].

In conclusion, we can say that Ukraine is trying to help overcome geopolitical and artistic walls, create conditions for global commerce of societies and societies, the conformation of a popular world order [1, p. 231]. Ukraine has made a conscious choice in favor of European integration.
